DETAILED ACTION

Claim Rejections - 35 USC § 102

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 9-11 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Booser et al or Gail. Note column 4, lines 4-21 of Booser et al and Figures 2-4 of Gail.

Claim Rejections - 35 USC § 112

Claims 9-11, 18 and 19 recite the limitation "said valve body" in lines 1 or 2. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 18 and 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 2, 5-8, 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 21-66 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references of Gold, Reed, Jennes, Susman and Cardenas et al are cited to show differential pressure relief for bearings.
